INTRODUCTION

This document contains the release notes for the LexisNexis InstantID Question and Answer (IIDQA) Nodes marketplace package available upon the PingOne Advanced Identity Cloud (Ping AIC) formerly known as ForgeRock Identity Cloud, as well as Ping Access Management (PingAM) formerly known as ForgeRock Access Management.

QUALIFICATION STATEMENT

Ping AIC / ForgeRock Identity Cloud

LexisNexis IIDQA Nodes are tested on Ping AIC the latest release of software. The nodes are part of the Ping Identity release process and validated on a regular basis.

PingAM / ForgeRock Access Management (On Premise)

This section documents testing performed with LexisNexis IIDQA Nodes. This table captures tested configurations. The intent is to demonstrate backwards compatibility. Newer versions of infrastructure compliant with Ping Identity published system requirements should be supported.

Component	AM 7.3	AM 7.4	AM 8.0
Java	OpenJDK11	OpenJDK11	OpenJDK17
Web Container	Tomcat 9	Tomcat 9	Tomcat 10

Note: The LexisNexis IIDQA Nodes are only compatible with PingAM / ForgeRock Access Management version 7.3 and later.

KNOWN ISSUES

This following is a complete list of currently known issues:

- There are no known issues at this time

CHANGE LIST

LexisNexis InstantID Question and Answer (IIDQA) Nodes 1.1.1 – December 2025

- Implemented feature to support quiz retest. When the original quiz does not completely fail, there is an indication from the IIDQA decision node to challenge for additional quiz questions. The challenge outcome can be directed to IIDQA Quiz Collector.
- Fixed a bug when using Shared State option to fetch optional attributes for the Get Quiz node. This is specific to how PingAIC attribute collector nodes inject information into shared state, mainly how the attribute collector injects information into `objectAttributes`.
- Updated Apache Commons Text library version to address a potential security vulnerability.

LexisNexis InstantID Question and Answer (IIDQA) Nodes 1.1.0 – August 2025

- Updated configuration with Base URL parameter replacing specific URIs, along with HTTP URL validation.
- Updated for most recent PingAM releases.

LexisNexis InstantID Question and Answer (IIDQA) Nodes 1.0.0 – November 2023

- Initial Release
